

Wireless Printing on Android Phones/Devices

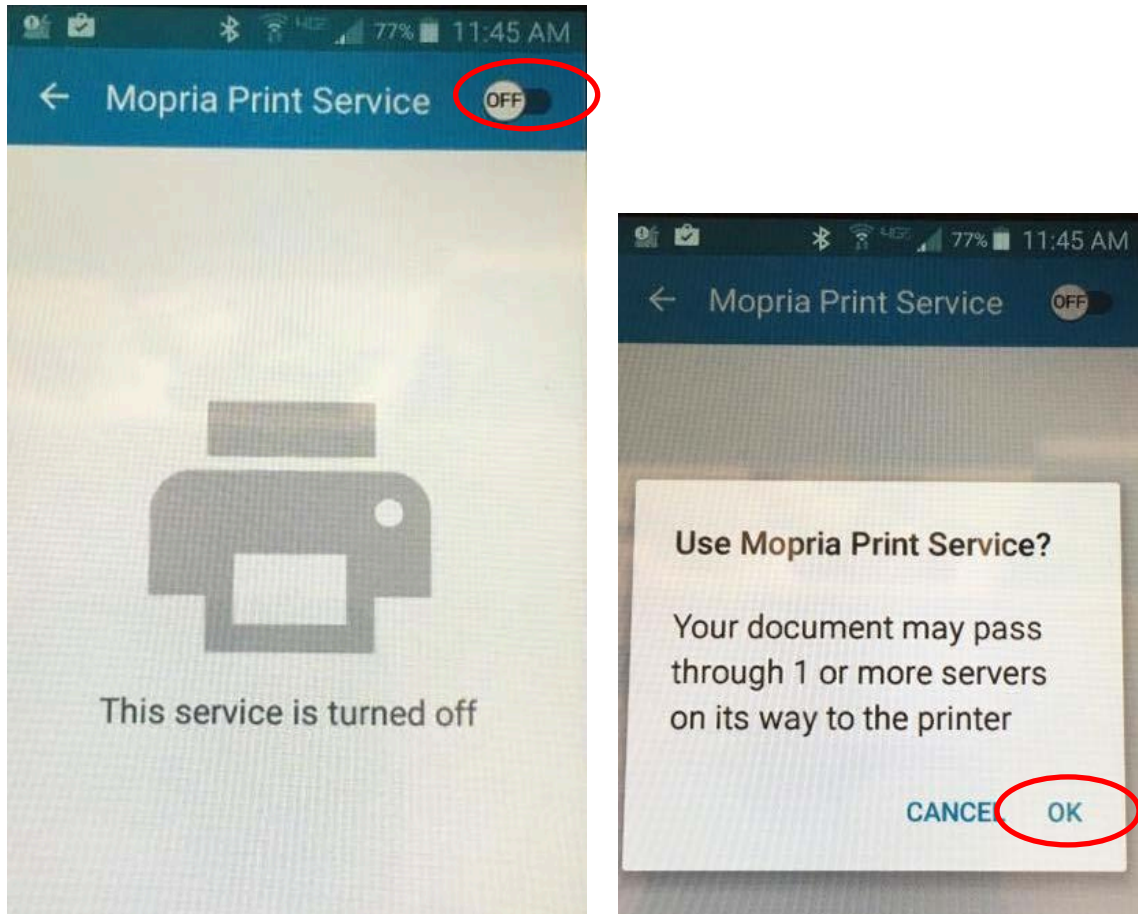

1. Connect to the library's WiFi – CCPLD_WiFi and agree to the terms to login.
2. Download the Mopria Print Service app from the Google Play Store.
3. Install the app by clicking Install and Accept:

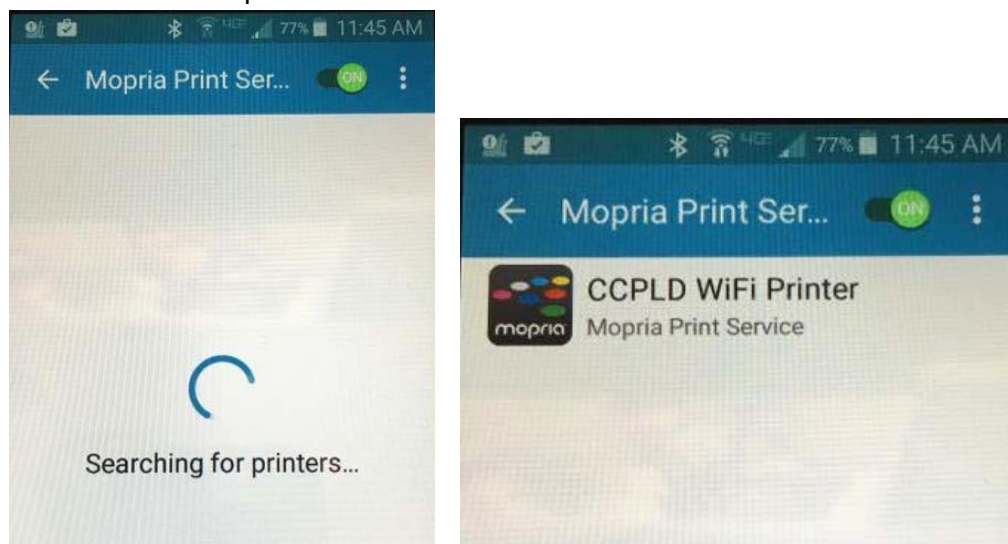

4. Once the app is installed you will see in the pull down menu that it needs to be enabled. Tap to enable the app:

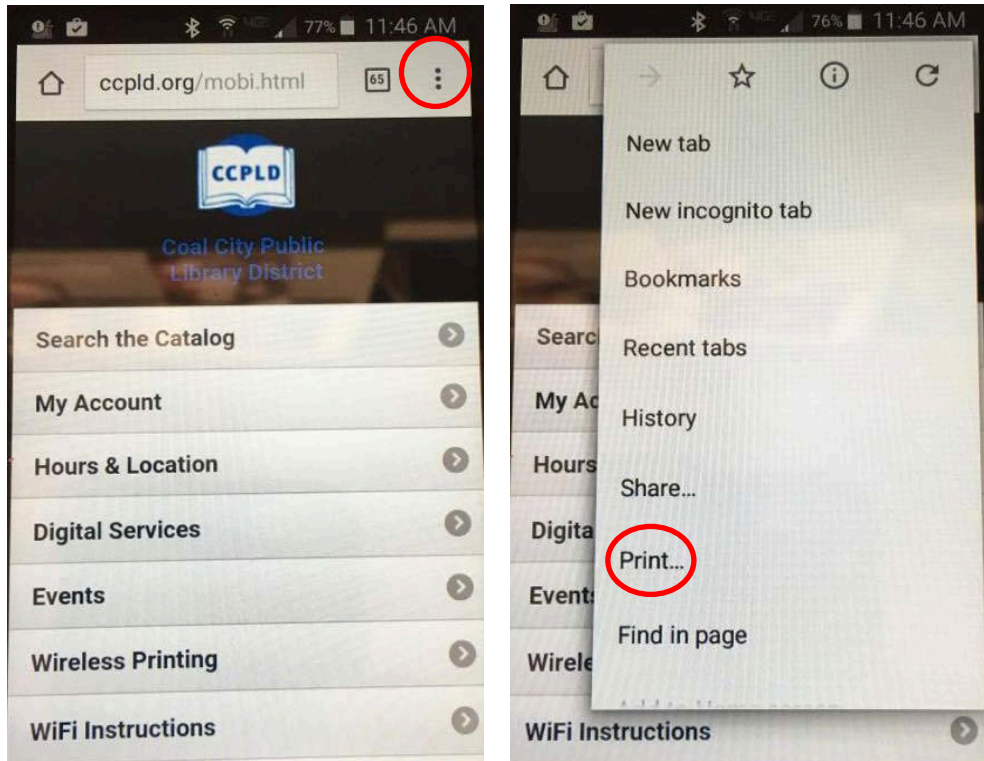

5. You will see the service is initially off, slide the button to the right. You will then be asked about using Mopria Print Service – click OK.

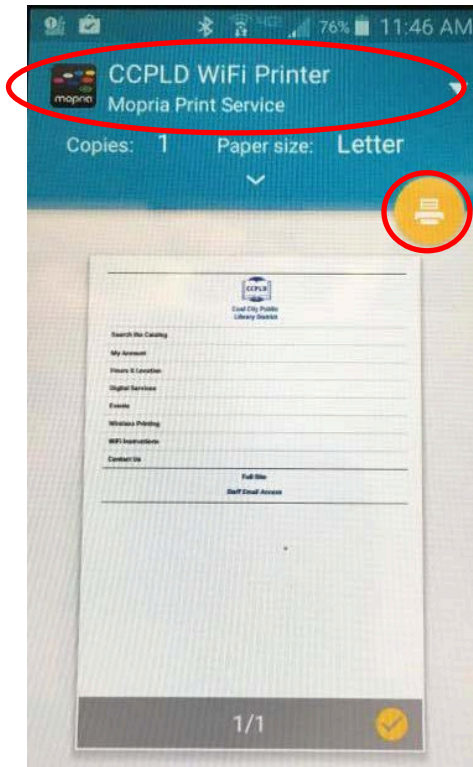

6. You will now see the service is enable and the CCPLD WiFi Printer should show up in the list after it searches for printers.

7. Now open your application you wish to print from (the example shows Google Chrome) and find the print button:

8. You will need to choose the printer in the software you are using, from a drop down menu or otherwise, and click print:

9. You should be able to view your print job in the pull down menu at the top:
